Team Assessment Tool for Thriving

This tool is designed for self-assessment of your group over time. It may help in setting priorities and monitoring progress over time. Feel free to add items to the list that are important to your group.

Group _____   Date_____

Person/people scoring (optional) _____

Rate your group on a 1-5 scale (1 strongly disagree to 5 strongly agree).
Consider all types of people that work in the group in answering each question. You may want to assign separate scores based on the group (i.e. if providers, nurses, MA's, patient relations specialists, etc. have a different experience than another group). You may not be able to achieve a high score in each category. Choose areas to address based on highest needs and ability to make change.

Overall	1	2	3	4	5	Comments
